

The Applicant

by Jack CJ Stark

NAME Julie White
ADDRESS 25 Walkerwood Drive ask me for more
TELEPHONE I do not want to share my number because I do not know you
EMAIL I do not have an email because I have never needed one and I am not a mindless zombie

VACANCY REFERENCE - ABI03092003224
POSITION - Business Data Analyst, Public Health Department
DATE OF APPLICATION - 20 November 2018

MOST RELEVANT EXPERIENCE/REASONS FOR APPLYING

Please demonstrate how you meet the person specification. Shortlisting will be based upon how well you demonstrate your ability to meet the essential criteria. You can use an additional two sheets maximum if necessary.

Please ensure the information shared in this section focuses on relevant experience pertaining to the person specification for the role applied for only.

I have a lot of experience with earning my Living by running my own successful business selling handmade Luxury Jewelry at affordable prices online and worldwide but this business is no longer operational because of some nasty people online but one day maybe we'll see. I had to close the business because I could not sell my luxury items anymore because some people gave 1 star reviews after their items were delivered differently to the items they ordered and they would not listen to me when I wanted to explain the Challenges of keeping an Inventory after a flood. People do not know how difficult it is to Run Your Own business and they think it's fine to give 1 star but it is not as I am proof of such.

After The Business closed I was made to apply for jobs by the job centre and I have gained lots of what you would probably call traditional employment experience but we would have to agree to disagree on that one as it is not hurting anyone to earn money by selling luxury items online as

we all need a little Glamour and it helps a girl feel special which you could not know if you are a man.

From October 2016 - December 2016 I was employed by the manager of the Hare and Hounds pub as a bartender. I had to stop working there because the punters constantly asked for this and that and treated me like I was less of a person than them which no I am not thank you very much. We are all equal even cats and dogs and maybe even horses but not rats because they are not as smart as a cat or a dog and my cats have always been members of my family whether they have my blood or not. My primary duty during this time was to be a bartender and I did that job very well because I gave it a lot of thought.

Between January 2017 and March 2017 I was employed as a Childcare Assistant at Castle Top Nursery. I really enjoyed working there because I was invited on a night out by some of the girls and I was a little concerned that we wouldn't get along with them being so young but we had a really lovely time and it helped keep the Morale up in what was a very stressful situation being in charge of so many children at once. It is difficult for me to write why I no longer work at this nursery but the reason involves the loss of a small loving Family member of mine. The owner of the nursery would not allow me to have time off to arrange the burial and time to grieve for my pet cat.

After two weeks of mourning I was ready to return to work but the owner of the Nursery said I was not needed back which made me very sad because I had become friendly not friends but friendly with some of the girls and after Suffering one loss I was not ready to have even more. I applied for a job working for a man who had a cleaning company called helpful hands and I did two days of a trial period cleaning the Homes of people that had too much money and couldn't know what it is like for those of us who struggle to have enough to put food on our table which yes is a real thing for us that don't have a job and no I don't have a large Television or drink except one bottle of wine of an evening with a meal because that's what the mediterraneans do and it never Harmed them. After I completed the trial period I was told I was no longer needed which means they must have not needed the cleaning anymore and the One percent like to tell us they are struggling too.

In May 2017 I started work at a newsagents I can't remember what it was called because it has a different name now. It is the shop on the corner of Cooper Street and Lockwood Drive and I think it was called Muslim Brothers or something similar to that. I chose to finish my employment with this establishment in August 2017 because the shop sold Whiskey and I don't like whiskey and it is important to stay true to our beliefs which yes is very important to me even if it is not important to you.

During August of the same year I did 2 weeks work with Lefton Business Centre as a personal secretary to the Gentleman owner of the business centre. My duties would involve doing everything a secretary does for a business owner like answering his Telephone and filing his papers and arranging business meetings and Managing his diary and ensuring his day runs smooth and without any problems although there are always problems that arise and that is to be expected it is not a reflection on the secretary just a normal part of running a very successful business. I was asked to leave this role after I discovered that I could not type and he wanted me to type instead of Handwriting things which we have been doing for all of my life but it seems that is not what people want these days because everyone is so focussed on looking at their mobile telephones all the time and nobody even reads anymore which is a shame because they are not learning important life skills that they will need even if they don't think they will and it will be too late when they need them. I had to pay my neighbour's son to type this exactly as I wrote it because it looks better when applying for jobs because it gives the impression one can type.

The job centre said I needed to be in employment or education and so in September 2017 I started a creative writing course level 1 at college because I have always enjoyed writing and reading is a passion of mine. I read at least one book a month and I think this is why it is shown that I have an excellent grasp of the English language and can use it in a very Unique way. I was enjoying the course but I could not complete it because I was asked to complete a Five Hundred word story but I could not do this well that is not true I could do it but it was too soon after the death of my cat and it is Unreasonable to ask someone to write such a story so soon after losing a member of their Family and that is my opinion and no I will not change it today.

I had a temporary job delivering free newspapers throughout November and December 2017. The job was initially Intended to get me through until I found a more Stable Job but I had to stop doing it because the newspapers left black ink all over my fingers so I wore some knitted gloves but then I couldn't grab the paper properly so I started wearing some rubber marigold gloves but I still could not feel the paper properly so I could not think of anything else to do and maybe you could but there we have it and I went back to not wearing gloves which meant I got the flu because my hands were Cold and so I had to stop even though I had a glass of Orange Juice Every Day.

In February 2018 I worked at Bake-A-Cake factory as a General Production Worker packing biscuits. You call this a mindless job but that's because you wear a suit and tie and sit behind a desk but physical labour is difficult and at least we were friends with each other which is more than can be said for you who sit in that Office on your own it must be lonely. I became Very Friendly with the ladies that I worked with even though they were from Bangladesh which may surprise you because of your prejudices but they didn't smell of Curry all the time and they could

Speak a kind of English but you have to be careful what you say these days even though when I was growing up my father would just say it as it was and it was just the way things were done in those days but not anymore because they are taking over which I have no concerns about because I can still go to Church. I worked with these ladies for 4 days and then I had to stop because the floor manager said I could not wear my Hat and no it is not a fashion statement it is a Prescribed Medical Intervention yes prescribed from a doctor that prevents gazes from other people and no I am not bald so think twice about asking that.

Because of my previous experience as a Secretary, I was able to take up a position as a Secretary for a business owner in March 2018 but I will not say who the business owner was because he is a very unpleasant man and any publicity he receives will help him sell his kitchens and no I will not be a part of that. I should write a book. To start with everything was going just fine with me learning to Answer the telephones and he said he didn't mind about me writing everything by hand because he preferred it that way and his Filing was in a mess which I put right but then he said it was not going well because he wanted a Younger Attractive Assistant that he could take in to meetings to impress his peers and when I put on some red lipstick he said it was not enough. Yes I did shoot staples at him but it would not have hurt him and I don't care if it did I would have beat him up no matter how big he was I could smash his face in he is just fat and before you say it yes I know I am also fat and there ARE double standards between fat men and fat women.

In April 2018 I started work as a shop assistant at Dick Dyke's Pets. I have very fond memories of working there. I worked there until the end of June 2018 which shows I am reliable and can commit to long term roles which I know is something you are looking for even though nobody seems to have a Permanent Job anymore and long gone are the days of people working in the same job for 30 years now people are lucky if they can have a job for longer than a few months well at least that is what I have found. The reason I left Dick Dyke's is because I really enjoyed seeing all the animals and pets that people would bring in with them except the snakes and when someone came in with a little pussy that looked just like mine it was too much for someone to expect another person to manage that situation without breaking down in tears which is a natural response to something so Devastating and it is perfectly normal for people to need time to grieve. Dick was not happy when I drew a notice with a very good impression of my dear beloved cat asking people to not enter the store with a cat that could remind me of mine and put it on the door. The risk was too high to me and the EU does not allow people to work in risky situations and so I had to stop working there.

Since June 2018 I have been seeking further employment. This is something new for me because since the closure of my business although it isn't really closed not really I have found work through people I know but the Economy has shrunk and this means there are not as many jobs available. When that Option dried out I had to start applying to Strangers which is something I

am not familiar with and this means I can not really get my character and personal strengths like excellent english and interpersonal skills through which is the thing that has always got me jobs. This explains why I have been unemployed for a very short time and I don't even hear back when I don't get an interview which is very rude indeed and not what I thought happened. When someone has taken the time to write out a well written letter it is basic courtesy to respond to let people know why they have not been given an opportunity to prove themselves in an interview they only take five minutes unless they take longer.

I have evidenced that I am reliable and have lots of experience working with people in many roles with a much broader base of experience than people like you who have never done that and I know you haven't done it because that's how you become a manager.

That's the end of the carbon copy section of my application and now I will show you why you should appoint me to your role. I do not know what a Business Data Analyst is but I am confident that I can quickly learn the role if you offer learning opportunities which is how you get experience and everyone wants experience for jobs before they even have the job which seems impossible to me so I don't know how you have managed to do it but there you go maybe you can teach me that too we will see. It makes sense that a Business Data Analyst will look at data for a business like income and outgoings and inventory stock levels which I have a lot of Experience with because I have been a company director myself so that should impress you and I can make the role my own and Define it as I go along.

It is worth mentioning that I do not want to work with any man that has a beard because that is a way for a man to show off that he can do something women can't do and we are not equal but I believe that is taking things too far so if you have a beard don't even bother asking me to come for an interview because I will not want to and yes I will be checking this when you offer me an interview. I have to say that I look forward to hearing back from you.

Yours faithfully,
Julie White
